Full-Stack Software Engineer

1. PROFESSIONAL CV

SUMMARY

Results-driven Full-Stack Developer with a strong foundation in modern JavaScript/TypeScript and Python ecosystems. Specializing in building scalable web applications, RESTful APIs, and data-driven dashboards. Adept at leveraging AI tools to accelerate development and possessing a keen eye for clean, minimalist, high-contrast UI design. Highly motivated self-starter and adaptable problem-solver, seeking remote freelance contracts, startup roles, and AI evaluation opportunities where technical rigor and fast learning are required.

TECHNICAL SKILLS

- **Frontend:** JavaScript (ES6+), TypeScript, React.js, Tailwind CSS, Vite, HTML5, CSS3
- **Backend:** Python, Flask, Node.js (basics), RESTful APIs, JWT Authentication
- **Databases & ORMs:** PostgreSQL, SQL Alchemy, Prisma
- **DevOps & Tools:** Git, GitHub, Docker, Ubuntu Server, Figma, Web Scraping
- **Soft Skills:** Remote Collaboration, Rapid Problem Solving, Technical Communication, Adaptability, Autonomous Work

TECHNICAL PROJECTS

Stack-Battle KE | *React, Flask, PostgreSQL, SQL Alchemy*

- Architected and developed a gamified competitive programming platform serving local engineering students.
- Implemented a robust backend using Flask to handle user authentication (JWT), secure API endpoints, and leaderboard logic.
- Built a responsive, light-mode frontend in React, integrating real-time score tracking and code submission workflows.

Grid Pit Lap | *React, Vite, OpenF1 API, Custom Hooks*

- Developed a high-performance Formula 1 dashboard to track live standings, lap times, and race session data.
- Optimized data fetching and state management using custom React hooks, significantly reducing render lag during live data updates.

EXPERIENCE

Freelance Full-Stack Developer | Remote | 2025 – Present

- Develop and deploy custom full-stack web applications for independent clients using React and Python/Flask.
- Configure and maintain remote Ubuntu servers for persistent application hosting and status logging.
- Integrate modern design handoffs seamlessly using Figma and Model Context Protocol (MCP) tools to ensure pixel-perfect UI execution.
- Review and optimize AI-generated code for technical accuracy, efficiency, and security best practices.

EDUCATION

Software Engineering Program | Moringa School – Nairobi, Kenya

- Focus: Full-Stack Web Development, Data Structures, Algorithms, and Agile Methodologies.

2. PROFESSIONAL BIO

I am a Full-Stack Software Engineer based in Nairobi, specializing in React, Python, and modern web architecture. With a strong focus on clean UI/UX and robust backend systems, I build scalable applications ranging from gamified coding platforms to financial dashboards. I thrive in fast-paced, remote environments and am deeply passionate about leveraging automation and AI to ship high-quality software efficiently.
